

nintex processfest

SEPT 30 - OCT 3 2019

Transforming the way people work

Nintex ProcessFest 2019 is here and designed for YOU. For the first time ever, we're very excited to bring our Nintex community a practical hands-on user training conference taking place September 30 (pre-day) to October 3, 2019. The event will be held at the ultra-modern W Hotel in Bellevue, Washington (just east of Seattle). Did we mention that Bellevue is also home to Nintex's U.S. headquarters and a great place to visit in early fall?

Whether you are new to leveraging the powerful and easy-to-use capabilities of the complete Nintex Process Platform, you're a seasoned process champion, or an IT and Ops pro who is eager to turbo-charge processes inside and outside your company, this is a don't miss event. By attending Nintex ProcessFest - you can and will reach new process management and automation heights with our industry-leading capabilities for process mapping, RPA, workflow, forms and mobile apps, e-signatures, document generation, process intelligence, and more.

When

PRE-DAY: Mon, Sept. 30, 2019

Pre-Day Certifications from 9 AM-5 PM & Welcome Reception that starts at 6PM.

For many out-of-town attendees this will be a travel day.

THREE-DAY CONFERENCE: Tues, Oct. 1-3, 2019

Full conference runs from 8 AM-5 PM with daily keynotes, training courses, sessions and more; plus fun evening activities.

Where

W Hotel

10455 Northeast 5th Place, Bellevue, WA 98004

Why

Because it is possible to transform the way people work around the world by making inefficient processes a thing of the past.

What's on the agenda

In addition to practitioner-level and expert-level hands-on training courses and all new certifications, Nintex ProcessFest includes daily keynotes and 20+ breakout sessions featuring product deep dives, roadmaps, best practices, customer solution showcases, and more. 1:1 consultations also can be booked with a Nintex expert for guidance around a particular process users are mapping, automating or optimizing with Nintex.

You can rest assured that we've reserved plenty of time each day and evening for you to network with your peers and have some fun!

Visit Nintex.com to stay up-to-date on session details.

The 411 on ProcessFest training courses

By registering today for Nintex ProcessFest 2019, you are making a smart and strategic investment in your career. You'll quickly expand your technical knowledge and skills by participating in our hands-on practitioner to expert-level instructor-led training courses being offered at a huge value and cost-savings for ProcessFest attendees.

PRACTITIONER TRAINING COURSES

Offered Pre-Day 9/30 and
Day Three, 10/3

- **Nintex Promapp®**
- **Nintex Workflow & Forms**
- **Nintex Foxtrot® RPA**
- **Nintex Drawloop***

*Only offered on 10/3

OFFERINGS

4 practitioner courses
4 exams

EXPERT TRAINING COURSES

Offered Pre-Day 9/30

- **Nintex Cloud Migration (Part 1-2)**
- **Nintex Promapp®**
- **Nintex Workflow Automation (Part 1-2)**

Day One 10/1 and
Day Two, 10/2

- **Nintex Promapp®**
- **Nintex Workflow Automation**
- **Nintex Foxtrot® RPA**
- **Nintex Cloud Migration**
- **Nintex Workflow Bootcamp**

OFFERINGS

5 expert courses
5 exams

Save your company \$\$\$

Register today!

We're including the cost of all the training courses/exams being offered at ProcessFest in the one-time event registration fee! You read that right.

**ProcessFest
early bird rate
\$995 USD**

Nintex ProcessFest registration will go up on Saturday, Aug. 31 to \$1,295.

Pass the ProcessFest certification exams and you'll leave the event as a certified practitioner or certified expert and be of even greater value to your company. You'll be equipped to know the best ways and types of automation to leverage to handle every process pain point or process opportunity, no matter how big or complex.

Space is limited and we're anticipating that Nintex ProcessFest 2019 will sell-out fast.

Don't wait – get yourself, your colleagues, and your friends registered today!

Process Management & Automation Training Courses

Monday, September 30

3 PRACTITIONER COURSES | 9 AM-5 PM (3 HOURS EACH)

3 EXPERT COURSES | 9 AM-5 PM (TWO - 4 HOURS, ONE - 8 HOURS)

Nintex Promapp® Training Practitioner Course

Go beyond the basic navigation and learn how to create, improve and manage processes. In this session, you'll gain practical skills to strengthen your process maturity and drive a process improvement culture by creating simple and engaging process maps that users can interact with. Before enrolling in this training, it is recommended you complete the Promapp for Everyday User course on learn.nintex.com. Upon course completion, you'll be able to:

Understand process information hierarchy (e.g. Policy / Process / Procedure / Work Instructions) and how these levels are best captured in Promapp

Create simple and engaging processes that are still rich and meaningful

Understand the different methods of capturing exceptions and process variations in Promapp without using the typical decision diamonds and loop-backs

Nintex Foxtrot® RPA Training Practitioner Course

Manual processes such as data entry and data retrieval can cost your organization valuable time and money. Learn how Nintex Foxtrot® RPA can help you break the efficiency barrier and get a better understanding of data automation. In this course, learn the Nintex Foxtrot® RPA basic core concepts, such as user interface, the run pane, simple targeting, the action pane, project pane, and preferences. Upon course completion, you'll be able to:

Understand how to capture data in variables to make your processes dynamic

Import data to be consumed by your Foxbots

Use Notes and Colors to add structure to your processes

Add formulas and clean data

Nintex Workflow and Forms Practitioner Course

New to Nintex Workflow? This course is for you! In this course, learn how workflows and forms can be built quickly using the Nintex Workflow and Forms Designers to collect data and user input, and transform how you work in your business. You will build a form to collect information from an end user, and then take the data they have entered to create a task driven workflow! While many actions and controls are available to you in the designer, we will begin with the core concepts and features the get you up and running quickly! Even if you have never built a workflow, this course is the best way to get up to speed with Nintex Workflow and Forms. Upon course completion, you'll be able to:

Navigate the Nintex Forms Designer and Nintex Workflow Designer

Understand how to collect user input and the benefits of using Nintex Forms

Use the data collected from a form and build a task-based workflow

Utilize variables and tokens to make dynamic workflows

Nintex Promapp® Training Expert Course

Enrich your process mapping skills by applying advanced features. Support service-based process mapping and enhance cross-departmental collaboration by applying process links and creating process group overviews. Use advanced functionality like lean tags, timeframes, and costs to support process improvement and automation initiatives. Upon course completion, you'll be able to:

Understand the different Nintex Promapp user types/privileges

Improve your process change management by linking users and roles

Apply various advanced features like tagging, timeframes, and costs to develop more robust processes that better equip end users

Support the management of processes by creating a strong process group architecture

Represent process dependencies across functional processes and end-to-end process flows using process group overviews

Process Management & Automation Training Courses

Monday, September 30

3 PRACTITIONER COURSES | 9 AM-5 PM (3 HOURS EACH)

3 EXPERT COURSES | 9 AM-5 PM (TWO - 4 HOURS, ONE - 8 HOURS)

Nintex Cloud Migration | Expert Course (8 hrs.)

Migrations don't have to be scary. In this course, you'll learn how to break down the cloud migration process in planning, execution, and post-migration sections to make sure you are covered throughout the entire migration journey. From differences by environment, the migration process, and post-migration testing and documentation, this course will have you cloud-ready.

Analysis and Prep

Environmental Analysis:
Differences in Analysis
Tools; Native Analysis
Tools

Reviewing My Workflows?:
Where are my workflows?
What can move to O365?
(Easy, Medium, Hard);
What cannot be moved?

Process vs. Workflow:
Difference between an
automated workflow
and a process;
Communicating
understanding and value
Building A Migration Plan

Migration and Post-Migration

Moving With Your Tool:
What tool will you use
for migration?; What
workflows will you
start with?

Example Migrations:
Avepoint, Quest,
Sharegate

Post-Migration Review:
Workflow refactoring;
What was left behind?

Nintex Workflow Automation Course Expert Course Part 1 (4 hrs.)

Processes rely on the ability to adhere to complex business logic in order to run efficiently and effectively. In this first module, you'll learn how to incorporate complex logic such as State Machines, Set Conditionals, and Run-Ifs into your workflows. You'll also work with data types such as dictionaries and collections to manipulate data sets where required. Upon course completion, you'll be able to:

Build a dynamic
workflow with Logic
and Flow actions

Implement best
practices and eliminate
recursive workflows

Work with data such in
collections (arrays) and
dictionaries (objects)

Troubleshoot
workflow errors

Nintex Workflow Automation Course Expert Course Part 2 (4 hrs.)

Learn to leverage both validation and formatting rules to build dynamic forms that change based on user input. These best practices will ensure your users have an efficient and clear understanding of the purpose of the form and the information required to start processes.

Understand when to
incorporate rules in your
Nintex Forms.

Use the Formula Builder
to build fool-proof rules.

Implement best practices
and considerations when
building rules.

Troubleshoot rules before
ever publishing a form.

Process Management & Automation Training Courses

Tuesday, October 1

4 EXPERT COURSES AND 1 PRACTITIONER COURSE | 1-5 PM (4 HOURS EACH)

Nintex Promapp® Training Expert Course

Enrich your process mapping skills by applying advanced features. Support service-based process mapping and enhance cross-departmental collaboration by applying process links and creating process group overviews. Use advanced functionality like lean tags, timeframes, and costs to support process improvement and automation initiatives. Upon course completion, you'll be able to:

Understand the different Nintex Promapp user types/privileges

Improve your process change management by linking users and roles

Apply various advanced features like tagging, timeframes, and costs to develop more robust processes that better equip end users

Support the management of processes by creating a strong process group architecture

Represent process dependencies across functional processes and end-to-end process flows using process group overviews

Nintex Foxtrot® RPA Training Expert Course

Some automated processes may need additional logic to ensure they can adapt to your business needs. Learn how to add scripting logic to your business processes and take further advantage of all the great tools available in Nintex Foxtrot® RPA. Upon course completion, you'll be able to:

Utilize If-Statements, Loops, and Tokens to make your business processes more dynamic

Understand script structure and flow in your Foxbots

Incorporate lists
Build complex target rules for capturing dynamic data

Nintex Workflow Automation Course Expert Course Part 1

Processes rely on the ability to adhere to complex business logic in order to run efficiently and effectively. In this first module, you'll learn how to incorporate complex logic such as State Machines, Set Conditionals, and Run-Ifs into your workflows. You'll also work with data types such as dictionaries and collections to manipulate data sets where required. Upon course completion, you'll be able to:

Build a dynamic workflow with Logic and Flow actions

Implement best practices and eliminate recursive workflows

Work with data such in collections (arrays) and dictionaries (objects)

Troubleshoot workflow errors

Nintex Workflow Bootcamp Expert Course Part 1

This expert-level bootcamp is an intensive dive into the core process automation elements of workflow, forms, and extensibility. The bootcamp is comprised of four modules that will be given in two parts over two days:

Workflow for Office 365 – expert level

Forms for Office 365 – expert level

Advanced Extensibility in Nintex Workflow for Office 365

Add – Serverless Computer Services to Your Solutions

Upon completion of the bootcamp, you'll be equipped to build sophisticated workflow automation solutions.

Even if you have never built a workflow, this course is the best way to get up to speed with Nintex Workflow and Forms. Upon course completion, you'll be able to:

Navigate the Nintex Forms Designer and Nintex Workflow Designer

Understand how to collect user input and the benefits of using Nintex Forms

Use the data collected from a form and build a task-based workflow

Utilize variables and tokens to make dynamic workflows

Nintex Drawloop Training Practitioner Course

Take Salesforce data and help create mission critical documents such as Contracts, Quotes, and Proposals. The ideal attendee is someone who has never used the tool before or would like to brush up on the basics of administrating a Document Package. A perfect course if you have never used Nintex Drawloop before or need to brush up on the basics of administrating a Document Package. Upon course completion, you'll be able to:

Build a Quote as your first Document Package

Build a table using data from child record

Gain confidence and a level understanding of using Nintex Drawloop

Who should attend Nintex ProcessFest 2019?

Our three-day training conference is seriously designed for you! By attending, you'll gain new process management and automation knowledge and skills and return to the office fully empowered and equipped to turn inefficient manual processes into a thing of the past.

What does it cost to attend Nintex ProcessFest?

The event early-bird rate of \$995 USD is available through Friday, Aug. 30. On Saturday, Aug. 31, the registration fee increases to \$1295 USD, the standard rate. So don't wait and register today.

Your registration fee includes all training courses and certification exams being offered at Nintex ProcessFest.

What's on the agenda?

The Nintex ProcessFest agenda includes daily keynotes, product deep dives, best practices, and roadmap sessions; customer showcases; 1:1 opportunities, and training courses and certifications. Event attendees will experience all of the aspects of the Nintex Process Platform and learn how to leverage the platform's powerful capabilities in their own organizations including: process mapping and management, workflow automation, robotic process automation (RPA), forms and mobile apps, document generation, e-signatures, process intelligence, and more.

Practitioner-level training courses will be offered during the Pre-Day (Sept. 30) and Day Three (Oct. 3). These courses include: Nintex Promapp®, Nintex Workflow & Forms, Nintex Foxtrot® RPA, and Nintex Drawloop (only offered on 10/3).

Expert-level courses will be offered on the conference's Day One and Day Two (Oct. 1 and 2) and will cover Nintex Promapp®, Nintex Workflow Automation, Nintex Foxtrot® RPA, Nintex Workflow Bootcamp, and Nintex Cloud Migration.

During Pre-Day (Sept. 30), we will also offer Nintex Cloud Migration (Part 1-2) and Nintex Workflow Automation (Part 1-2) during 8 hour sessions, plus a 4 hour Nintex Promapp session.

The agenda is subject to change, visit Nintex.com for the most up-to-date information.

How can I learn about sponsor and exhibitor opportunities?

To learn more about sponsorship, contact Nintex.Events@Nintex.com.

Where can I access session information afterward?

Session information will be posted on Nintex.com shortly after ProcessFest 2019.

Is there a code of conduct for Nintex ProcessFest attendees?

Nintex ProcessFest is designed to be a respectful, friendly, and inclusive experience for everyone who attends. Our 2019 attendees are expected to act accordingly at all conference events, including business and social activities.

What are the accessibility and personal consideration accommodations available at Nintex ProcessFest?

We want all attendees to be safe and comfortable at Nintex ProcessFest. When completing your registration, you will be asked to provide information regarding dietary and accessibility considerations, which will help us make any adjustments to ensure you have a positive experience. The W Bellevue and the Westin Bellevue are fully ADA-compliant.

Where should I address any additional questions regarding Nintex ProcessFest?

Email us at Nintex.Events@nintex.com.

Registration Questions

How do I access or update my registration?

Our registration site allows you to register or cancel your registration, view and print your confirmation, arrange your hotel reservation, and view/print your invoice or receipt.

How can I get help with my registration?

Email Nintex.Events@nintex.com for help with your registration.

What are the policies for cancellation and refund?

Space is limited at Nintex ProcessFest 2019 and refunds are not guaranteed.

What is the substitution policy?

You may substitute a new person in an active ProcessFest registration at no additional charge before August 30, 2019. To request substitution, sign in to your registration account and select "substitute another person for this registration".

Do you offer bulk or group discounts?

No.

How do I print a receipt for my Nintex ProcessFest pass?

You will have the option to print a receipt when you complete your registration. An email confirming your attendance will be sent immediately to the email address that you provide.

What forms of payment are accepted for Nintex ProcessFest?

All major credit cards are accepted.

What do I need to know about travel requirements?

We recommend booking your travel as quickly as possible to secure the best airfare and to use the hotel links that we provide in the ProcessFest registration tool to secure the event rate at The W Bellevue and Westin Bellevue.

How can I reserve a hotel room?

On the Lodging page of the registration site, you will be asked if you require hotel accommodations and will find links to the two hotels – The W Bellevue and Westin Bellevue – where we have room blocks confirmed for a percentage of our expected attendance. If the blocks have been filled, we recommend following your company's travel policy to secure a guest room in the downtown Bellevue core. While Seattle hotels may seem close by, traffic can increase Seattle/Bellevue travel times to more than an hour.

What if I have a question that isn't answered here?

Please email Nintex.Events@nintex.com with your questions.
